

Group Video Presentation – UNIV 2020

Overview: You will collaborate with an assigned group to make a video presentation in response to the Problem of sustainable public transportation in the Dallas area. According to the United Nations, *sustainability* refers to “meeting the needs of the present without compromising the ability of future generations to meet their own needs now.” Sustainability is difficult to achieve. These challenges cannot be addressed individually. Instead, groups who come together to share and exchange ideas will be able to create more sustainable communities. Along with your teammates, **your task is to construct a video presentation that demonstrates your ability to communicate and present an argument for which solution best helps to address the problem.**

Purpose: The purpose of the assignment is to assess the oral communication, teamwork, personal responsibility, social responsibility, and critical thinking skills that you have developed over the past couple of years as a UT Dallas student through your core coursework. Working in teams will be essential to your academic and professional career. The assignment is designed for you to:

- (1) orally present information and a solution to a real-world problem
- (2) work collaboratively with peers through teamwork

Assignment Instructions:

- Bring your ideas from the individual written response paper to discuss in group meetings. In these meetings be sure to discuss which solution that you individually identified as best.
- Use the information from sources to explain why the proposed solution is useful and/or important to addressing the problem.
- Discuss the social, political, environmental, and economic components of a complex world problem, and will provide a solution that addresses sustainability in each of those areas.
- Identify potential challenges to the proposed solution and methods for overcoming those challenges.
- Use a visual aid (PowerPoint, Prezi, infographics, charts, etc.) to structure key points.
- Record a video presentation identifying the **one** solution that your group thinks best addresses the Problem.

Length: The presentation should be between 5-7 minutes long.

Sources: The only sources that you will need to complete the assignment can be found in the document library. No additional sources are needed.

Assignment Due Date: September 23, 2022 on E-Learning
